## Growing High-Value Crops in Honduras

Submitted by jcupp on May 29, 2014

With Feed the Future's help, women farmers are learning to produce high-value crops in Honduras. The woman pictured here is a member of a women's group that has ventured into growing French beans for export to Guatemala. "We never dreamed of producing anything beyond corn and beans, and now we are producing this very profitable crop ourselves." *Photo by Hector Santos, USAID*
